

Environmental Policy

The company undertakes painting, general building maintenance and line marking to the commercial, industrial, Defence/ government sectors and the construction industry in general.

We have extensive experience working on large and technically challenging painting projects Victoria wide.

Our strength lies in painting and refurbishment project planning, trade team, commercial, site remediation, feasibility planning, and the ability to manage client site activities from conception to completion.

We build teams by instilling pride in the service we provide. We create a culture of honesty and workmanship. We serve customers and communities through transparent communication, collaboration and by building trust and mutual respect.

We are committed to ongoing compliance with the requirements of the ISO 14001:2015 Environmental Management Systems specification.

MMP Projects will seek to protect the environment and promote a sustainable future by:

- Complying with relevant environmental obligations (acts, standards, regulations, codes of practice, guidelines) as well as any other requirements that may be pertinent to the company's activities and as an integral part of our continuous improvement process.
- Ensuring all waste is both minimised and disposed of in the most appropriate and environmentally sensitive way possible. This includes assessing the life cycle of materials and if required, engaging suitably qualified specialist contractors for the disposal of high-risk waste.
- Establishing, reviewing, and communicating our company's environmental objectives to all levels in the organisation. The objectives and targets (incorporated in the IMS Objective and Targets Management Plan) will be developed using a risk-based approach and monitored on an ongoing basis by the OH&S-E committee and regularly reviewed during management meetings.
- Management of resources with consideration for the environmental impact, especially regarding consumption of energy, water, consumables, and chemical materials.
- Training and providing information to all employees, via our MMP Projects Induction Program, so that they are aware of our environmental management procedures and that they may be able to carry them out effectively.
- Striving to continuously improve our environmental performance and minimise the social impact and potential damage of activities by periodically reviewing our environmental policy in light of our current and planned future activities.

This policy is communicated to all staff and subcontractors through inductions and is reviewed annually during the management review meetings. It is also made available to interested parties through our website.
